Insights about Carmen Viqueira´s scholar life as a teacher in the Iberoamericana University

Miriam Bertran Vilà[1]

Abstract:

Without any doubt, a very important part of the academic life of Carmen Viqueira took place in the classroom of the Iberoamericana University where her dedication to the students was complete. I consider that her legacy was not only in writings but in the engraving she left in her students, today recognized anthropologists and professors themselves who have learned with Carmen how to build a problem of investigation and now are in charge of transmitting that knowledge. In a way, It seems to me that her educational style and her professional research can be explain by her family ties to the Free Institution of Education (Institución Libre de Enseñanza), a reference as a cultural and pedagogical center founded in Spain at the end of the XIXth century. Trying to highlight this legacy, at least from my experience as a student, I present hereby some insights about Carmen Viquiera´s work as a teacher at the Iberoamericana University.
