

Recommendations to improve the Public-Private Scheme of Partnership in México

Heidi Claudia Sada Correa e Ingrid Fabiola Sada Correa¹

Abstract:

Major international organizations such as the Organization for Cooperation and Economic Development, the World Bank and the Inter-American Development Bank had argued that the investment in infrastructure turns to be a very relevant factor to increase economic growth and to improve the citizens' quality of life in every country. In order to achieve a better relation between quality and price of these investments, the Mexican Government has sought to implement innovative schemes under the Federal Law of 2012, such as the public-private associations where the government and private sector are partners in the development and/or the operation of infrastructure. Although this scheme represents a major step forward, the Law enacted need to improve the institutional conditions requires for achieving efficiency.

The goal of this paper is to identify those organizational and institutional factors that should be considered to the better implementation and evaluation of projects.

Keywords: *Infrastructure, Development, Public-Private Partnerships*
